★ TO THE TEACHER ★

Hi! I'm so glad to meet you!

My name is Selena and I'm the creator of Look! We're Learning!

Teaching primary grade students is one of the most awesome professions in the world. But it does pose its own set of challenges.

My goal is to create early education resources that are a joy to use with your learners. Happy teachers inspire students!

Have a question? Not sure about a product's use? Just want to say hi? Send me an email message at selena@lookwerelearning.com.

I'd love to hear from you!

★ INSTRUCTIONS ★

Use a coffee filter and the paper templates on the next pages to make a simple frog craft!

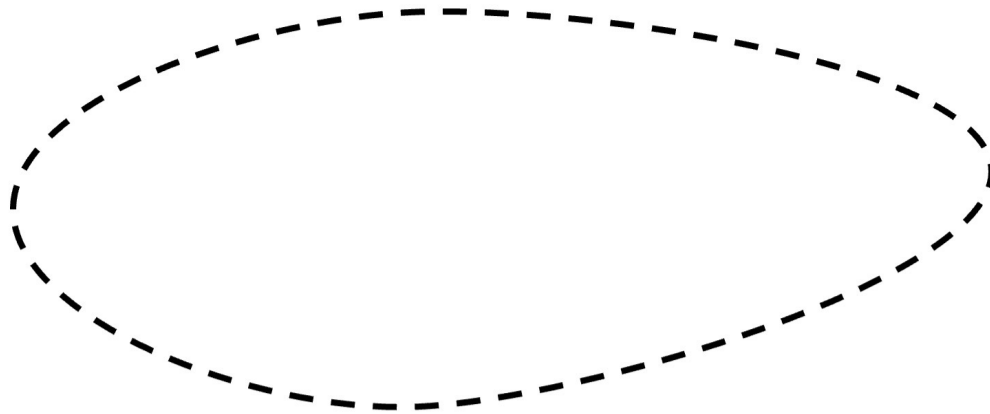

Begin by coloring the frog body template pieces. Then cut them out as separate parts. Color a white basket-style coffee filter green.

Lay the colored coffee filter onto the center of a piece of construction paper. Don't glue it in place yet. Have students place the feet underneath the lower edge of the coffee filter and glue them down.

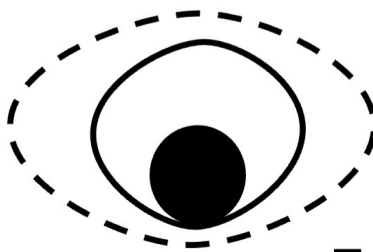

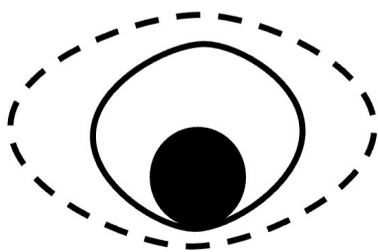

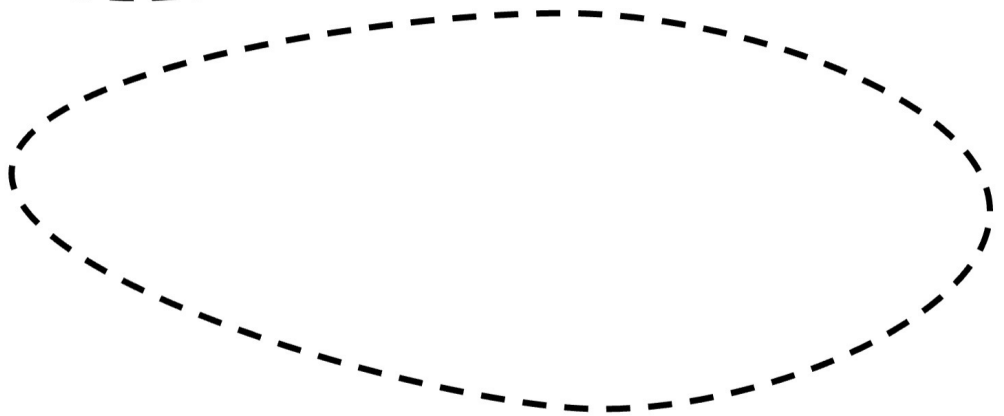

Then they can add the legs on either side underneath the filter. Glue them in place. Finally glue the coffee filter on top and glue the eyes onto the top of the head. A color version is also included.

See the finished craft [here](#).
